

NOTE NUMBER 2

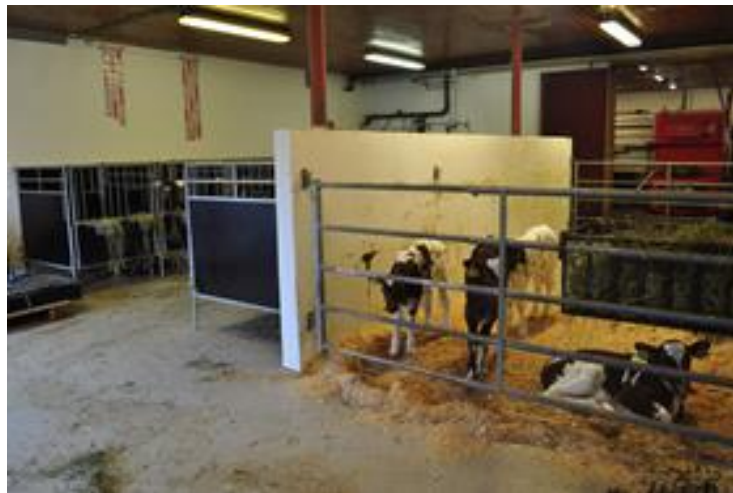

Cows

Cows

- Free range farm on Skjetlein VGS → Give the animals the possibility to behave as they should. From 2024 shall all cattle be put in free range farms. If you are going to build a cattle farm, you will have to build free range. When the cattle are standing in stalls, they don't have the opportunity to behave normal.
- The cattle shall be protected from unnecessarily stress, suffering and pain.

- Calves shall not be tied, they have separate bins, after the first three-four weeks they are moved in larger bins with other calves at the same age.

- The farmer must have the right competence within caring and handling.

- The inventory of the animal room shall be constructed in a way, that the animals there can't get hurt, or hurt other animals.
- The cattle claim an opportunity to grass every summer for 8 weeks. Cattle in stalls claims 16 weeks.

- The climate shall be costumed the animals age, race etc.
- Cattles should not be postponed for unnecessary noise. The noise level should be so low that it won't become a disadvantage for the animals.
- The cattle should have supervision at least twice a day. Sick ones, pregnant or calves should have more. If the cattle are outside, you should look for them at least once a day.

Feeding shall increase good health and welfare.
